June 21st –July 1st

Under the Sea: Discover the world's oceans and the creatures that live there. We will explore everything from the smallest microscopic creatures to the blue whale, while we take a closer look at the creatures that live in our own backyard, The Long Island Sound.

July 5th -15th

Dinosaurs: Are you an Omnivore, a Carnivore, or a Herbivore? We'll go back in time to when the dinosaurs roamed the earth to meet some of those big guys and find out more about them. We will dig like paleontologists to try and discover our very own dinosaur.

July 19th -29th

Artist Study: Come discover the crazy French Impressionists. Learn about their styles, techniques, and mediums, in a fun creative session. We will be painting, sculpting, and creating masterpieces.

Aug 2nd – 12th

Animals and their Habitats: Why do turtles have shells? Why does our snake have a funny nose? Why are an Africa elephant's ears so big? While traveling through deserts, plains, the tundra, mountains, and forests in search of unique creatures, we will answer these questions and more.

Aug 2nd – 12th

Space Camp: Come blast off into space. Learn about the different planets like the gaseous giants and the tiny dwarfs. Create a planetarium in the classroom and explore the outer reaches of our universe.

Feel confident that your children will have a safe and fun summer adventure!
